INTRODUCTION

A FULLY CARBON FIBER NEW MASTERPIECE: SAY 42

THE GERMAN MANUFACTURER

In recent years, SAY has managed to advance from a newcomer to an international, established manufacturer of luxury motor boats. In Southern Germany near lake Constance, innovative, high-tech yachts are built from carbon fibre, using the latest technology and processes.

EXPERIENCE SUSTAINABLE AND EXEMPLARY BOATING

What makes a SAY Carbon Yacht so special? They are designed, engineered and manufactured entirely in Germany with the highest level of craftsmanship by carbon fibre specialists. Carbon is a robust, extremely solid, ultra-high material with maximum durability that can withstand the highest requirements and is therefore used extensively in aviation, motorsports and further high-tech applications.

A SAY 42 (12.96m x 3.99m) weights only 4.5 tons when fully equipped. In combination with two certified ultra-low emission V8 engines from Volvo Penta (860 HP), this model consumes only 45 litres of fuel (petrol) per hour at an average speed of 20 knots. That is 50% less than comparable models. Above all, this also means that considerably fewer emissions are emitted!

PIONEERS OF LIGHTNESS

Another remarkable unique selling point: Due to very low weight, guests on board experience breathtaking accelerations from 0 to top speed of more than 50 knots within seconds - as you are otherwise only used to from supercars.

SPECIFICATIONS

YEAR BUILT REFIT	2021
FLAG	SPAIN
LENGTH m	12.96
BEAM m	3.99
DRAFT m	0.87
MAX PASSENGERS	12
CABINS	1
BERTHS	3
